- Utilized back-end technologies such as PHP Laravel and MySQL to support website functionality and database management.
- *Skills: JavaScript, Tailwind CSS, Alpine, PHP Laravel, Strapi Headless CMS*

FEATURED PROJECTS

UNHCR - NassWallet Digital Banking (API Integration)   2022 - 2023

Coordinating and leading a project to deliver a new service for the United Nations High Commissioner for Refugees (UNHCR) by integrating NassWallet system with IrisGuard recognition service.
- The project involved working closely with UNHCR to understand their requirements and determine the best approach to integrate NassWallet and IrisGuard. As the project lead, I was responsible for managing all aspects of the project, from planning and design to testing and Quality Assurance.
- Using this service, UNHCR targeted 27,000 refugees to deliver cash through several batches across Iraq using NassWallet "Cash out by IRIS" service.

Western Union - NassWallet Digital Banking (API Integration)   2023
- Developed appropriate prototypes and conducted extensive testing to ensure seamless integration of the two systems.
- Coordinated with third-party vendors and cross-functional teams to manage project milestones and ensure smooth communication and collaboration.

NassWallet Website (Web Development)   2022

Using my web development skills, I have implemented purely unique Template based on custom prototype design with applying best web practices and ensuring high performance.
- **Frontend:** Tailwind CSS, Alpine.JS, Twig templating engine, Google Maps API
- **Backend:** PHP Laravel

Ticketing System for TEDxNishtiman Event (Mobile Development)   2021

Using my Flutter Skills and NassWallet APIs, I have facilitated the entry to TEDx event by scanning a QR code as a replacement of a Ticket for NassWallet Account holders preventing any duplication.

- **Frontend**: Flutter
- **Backend**: Firebase
